

Group number: 37

Project title: High Clarity Speaker System

Client &/Advisor: Dr. Louis Banitt, M.D. / Professor Tuttle.

Team Members/Role: Quinn Rayner, Nicholas Bramanti, Arifi Salim, Andrew McNeil

○ **Weekly Summary (Short summary about what you did this week)**

This week we met during class, and discussed where we were, and where we think we should be by next week. We decided that Bluetooth would work for our application, but Arifi brought up how Raspberry Pi's have built in wifi. We decided we're going to bring our price issues to Tuttle, and ask him for advice before we move forward. The current assumption is that Bluetooth will be cheaper, and this will become an issue as we add more and more speakers to the system.

○ **Individual contributions**

<u>NAME</u>	<u>Individual Contributions</u>	<u>Hours this week</u>	<u>HOURS cumulative</u>
Quinn	Weekly report. Technology research	2	6
Nick	Technology research, communicated with Tuttle	2	6
Arifi	Technology research	2	6
Andrew	Technology research	-	4

- **Plan for coming week (please describe as what, who, when)**
 - Quinn: bring technologies and pricing to group meeting this week
 - Nick: bring technologies and pricing to group meeting this week
 - Arifi: bring technologies and pricing to group meeting this week
 - Andrew: bring technologies and pricing to group meeting this week
